

# Why your customers need the HPC CodeMax®

They need an automatic computerized key machine that can do the work for them while maintaining accuracy.

## How to sell the HPC CodeMax®

### Key Selling Points:

- \* HPC introduced the first computerized code machine, the CodeMax® in 1986, based on the “Standard-of-the-Industry” Blitz™. There are many CodeMax® machines in vehicles and shops all around the world that security professionals have been relying on to cut accurate keys for years.
- \* The HPC CodeMax® comes with FREE software (CodeSource® Lite if you need access to millions of codes or KeyTrail® if you need key management software).
- \* Load a blank, enter the manufacturer and bitting, and the CodeMax® will do the rest. This frees up your time to work on another machine or take care of another customer.
- \* Unlike some computerized machines that require the entry of complete depth and space information, the HPC CodeMax® uses DSD numbers that store all the pertinent information of over 900 different lock types.
- \* Download master key systems to the CodeMax®, allowing error-free key cutting, while providing you with hours of extra time.
