

# AD-Series

*Adaptable Electronic Security*

What if you could **upgrade** your lock without ever taking it off the door? What if you had options to truly customize your security solution, **without compromising**? What if your security solution met your needs now, and **changed** with them in the future? What if your new electronic lock provided **seamless integration** with your existing software? What if there was a solution that made it easy to **secure more doors** – more efficiently? What if your lock's hardware was as **easy to upgrade** as its software?

## We started by asking questions.

Questions that no one had ever asked before.

Questions that had the potential to revolutionize security.

Now, after countless hours of research, engineering, testing and refinement, we're pleased to present the answer.

What if your security solution came with a **lower cost of ownership**? What if your lock could inspire **confidence**? What if you could be **prepared** for the unpredictable? What if your electronic lock provided a **migration path** to future technology needs? What if a lock could not only **protect** your facility, but also **protect your investment**?

**What if Schlage delivered a single solution that addressed all your concerns about electronic access control?**

## Introducing the AD-Series Electronic Lock from Schlage.

It's ready for anything. Even the future.

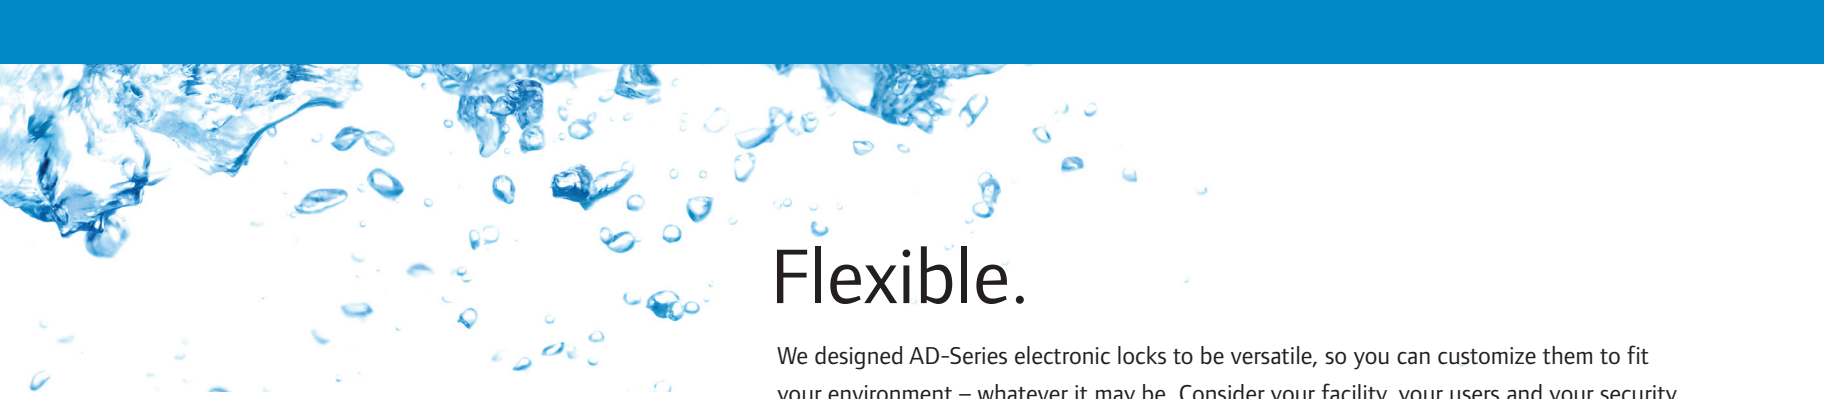

You can't predict what will happen tomorrow. But you can be ready for it, thanks to the new AD-Series from Schlage. This isn't simply a lock. It's a revolutionary new access control solution that's redefining the security industry.

The AD-Series provides the same level of security and innovation you've always expected from Schlage. And with integrated intelligence it allows you to keep your people, property and assets safe and secure in a productive and efficient way.

Designed from the ground up to be completely flexible, adaptable and scalable, the AD-Series is a perfect fit today and can be upgraded to meet your evolving needs in the future. And most of all, it provides you with confidence and peace of mind because you know that with Schlage your investment is every bit as secure as your facility.

**FLEXIBLE  
ADAPTABLE  
SCALABLE**

## Flexible.

We designed AD-Series electronic locks to be versatile, so you can customize them to fit your environment – whatever it may be. Consider your facility, your users and your security needs, then select the options that are right for you. Whether you manage a large building or institution with complex demands or a small business with just a few openings, you can configure your AD-Series locks to create the ideal custom fit.

The AD-Series makes the installation process simpler and gives you more options for outfitting new and existing facilities with electronic access control. Its integrated design incorporates components that are traditionally located around the door into the lock, providing you with a smarter solution with enhanced value and functionality. And our wireless technology gives you the option to install access control on doors that have traditionally been difficult to wire.

*“The AD-Series gives me options.  
Lots of options.”*

– FACILITY MANAGER, FORTUNE 500 COMPANY

*These are just some of the choices the AD-Series offers:*

- Multiple credential reader technologies.
- Offline, hardwired and wireless networking options.
- Compatibility with popular brands of exit devices such as Von Duprin and Falcon.
- Locking functions for specific applications.
- Field configurable settings.
- Power and cylinder options.
- A variety of finishes and levers.

# Adaptable.

It's unavoidable. Your security needs will change over time. And so will technology. By choosing an adaptable, open architecture security solution, you can be sure that it will fit into your new environment today and be ready for whatever the future holds.

AD-Series locks from Schlage feature a patent-pending modular design that allows you to adapt to new technologies with ease. This revolutionary breakthrough means you can change credential readers and network capabilities without replacing your entire lock; or even taking it off the door. And that means huge savings in time and money.

*"I'm not worried  
about the future.  
I'm ready for it."*

– DIRECTOR OF HOUSING, UNIVERSITY

## *AD-Series locks adapt, allowing you to:*

- Upgrade readers and network modules to meet your changing needs.
- Integrate with Schlage® or third party software via open architecture platform.
- Easily upgrade from an offline to a networked solution.
- Change credential platforms when required.
- Use innovative technologies as they emerge.

*“Unforeseen changes?  
Bring ‘em on.”*

– SECURITY DIRECTOR, HOSPITAL

## Scalable.

Environments grow, change and remake themselves everyday. In the past, anticipating those trends was a real challenge for facility managers and security personnel. But no longer. The features that make AD-Series locks flexible and adaptable also make them scalable – protecting your investment for years to come.

With the AD-Series from Schlage, there’s no need to outfit your entire facility at once. Whether it’s new construction or an existing facility, you can start small and add access control to more openings as budgets permit. You can also choose which openings you prefer to have offline or networked, and even manage both types of locks with the same software. In the end, it means you can afford to have more locks on more doors, so you can provide more complete security.

*The scalable nature of AD-Series locks gives you:*

- Increased security and the freedom to grow at your own pace.
- The ability to upgrade your reader and networking options.
- The option to migrate to more secure credential technologies.
- A single solution for offline and hardwired or wireless networked openings.
- A cost effective solution for businesses of any size.

# Your facility. Your investment. Your future. They're all protected with the AD-Series from Schlage.

There's never been a leap forward in security like this before. The AD-Series is a completely customizable solution that protects your facility and your investment. Now, you're free to create a custom

security package that's perfectly tailored to your environment. And as your needs change and new technologies emerge, you can be sure that the AD-Series will adapt.

*Schlage electronic security is ideally suited for a wide range of applications including:*

## *Education*

In educational settings, whether K-12 or college, AD-Series locks are the smart choice. Their revolutionary design keeps students, staff, visitors – and your investment – safe and secure.

## *Healthcare*

When you know your facility is safe, you're free to focus on what really matters: patient care. AD-Series locks provide complete confidence for today and tomorrow in healthcare settings of all sizes.

## *Government*

For military bases, government offices and other public facilities, you need to make security decisions that are reliable and cost-effective. The AD-Series will deliver today and tomorrow.

## *Commercial*

Because you can customize it to fit nearly any need, the AD-Series is right at home in commercial settings, making it the perfect choice for long-term value for both office and retail applications.

## *Multi Housing and Mixed Use*

This is a complex environment where both residents and tenants need access to private and public spaces. The AD-Series provides an access system that is flexible, adaptable and easy to use and maintain.

Ingersoll Rand's Security Technologies sector is a leading global provider of products and services that make environments safe, secure and productive. The sector's market-leading products include electronic and biometric access-control systems; time-and-attendance and personnel scheduling systems; mechanical locks; portable security; door closers, exit devices, architectural hardware, and steel doors and frames; and other technologies and services for global security markets.
